Project-02: Deploy Code on a Docker Container using Jenkins on AWS

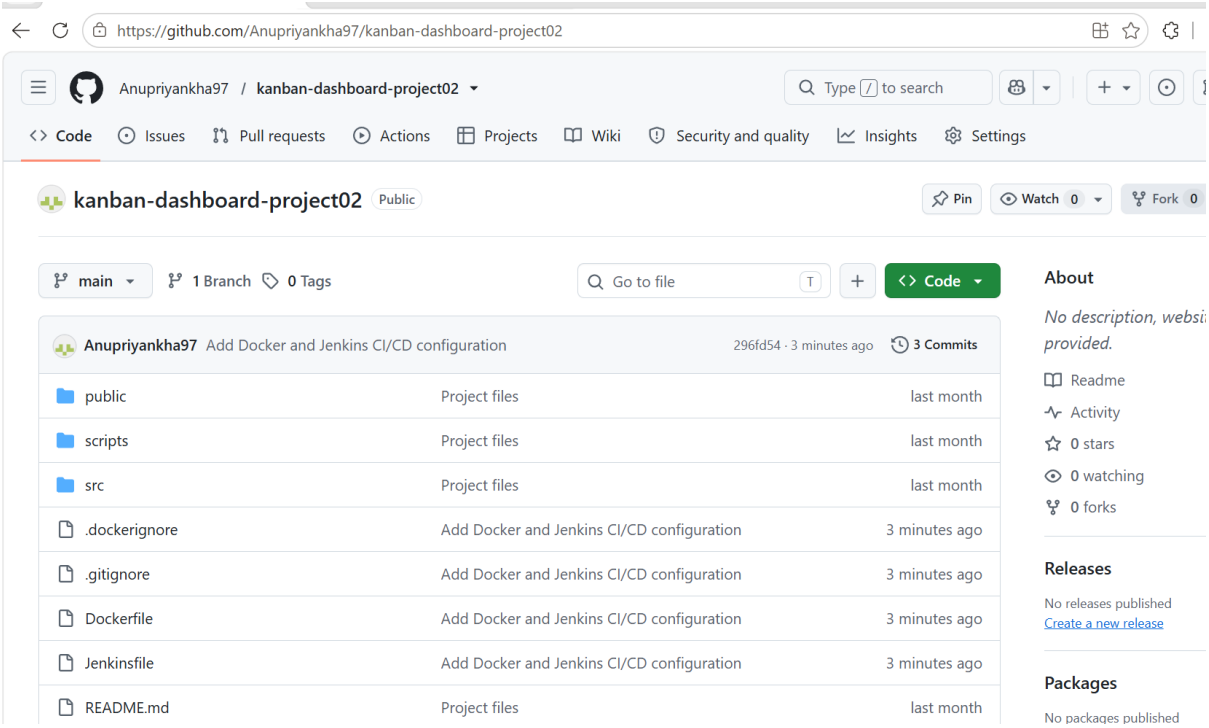

This project demonstrates an automated **CI/CD pipeline** where application code is pushed to GitHub, built using Jenkins, packaged as a Docker image, pushed to Docker Hub, and automatically deployed on an AWS EC2 instance. The deployment includes container health checks, validation, resource limits, and rollback handling to ensure reliable production deployment.

Project-02: Docker + Jenkins CI/CD Deployment

Project: Kanban Task Manager
Repository: https://github.com/Anupriyankha97/kanban-dashboard-project02
Docker Hub: https://hub.docker.com/r/anupriyankha/kanban-dashboard
Jenkins: http://52.91.55.187:8080/
Application: http://52.91.55.187/
Platform: AWS EC2
CI/CD: GitHub → Jenkins → Docker → Docker Hub → AWS EC2

Technologies: React, Vite, Docker, Jenkins, Nginx, GitHub, Docker Hub, AWS EC2

Deployment Status: Successfully deployed and validated.
